Joel,

Here is a screenshot of the acknowledgement I received in Verify regarding the waiver for 71D.

I don't mind submitting it again if it makes life easier. Please let me know. Thanks

Best Regards,

Hi Travis. This is the response I got from the Verify team:

The attachment that Travis sent you was the input file which they submitted to Verify. Before I asked him to resubmit his CTDI, I would be interested in seeing a copy of the processing report/output file to see if the data did in fact get accepted.

Thanks,

Karen

Could you send in the report she requested and we will let you know if you need to re-submit.

Joel,

Thanks for the reply. The waiver for 71D was submitted on 1/17/14 and showed as "accepted" by VERIFY at approximately 14:44.

I attached the .xml

Let me know if you still cannot see it. If not, perhaps I should submit again?

I will figure out our N2O plans and get back to you, but let's move forward for now with the confirmatory on 61B as soon as practical. I somehow don't see a voicemail from you, just to confirm, my phone is 313-399-7256.

Thanks

Hi Travis,

I see the CTDI for the 8,500-10k T.G. FFMXD06.761B, but I do not see one to for the over 10K T.G. FFMXD06.771D. I am going to select the 8,500-10k T.G. FFMXD06.761B vehicle for confirmatory testing. As I mentioned in my voicemail, we will not be able to get official N₂O results for approximately one month. If that timing works for you, please let me know and I'll inform the lab to make sure they are ready. If not you will need to make arrangements to measure the N₂O on this vehicle as well.

Hi Joel,

I submitted a test waiver for our 8.5-10K F-250/F-350 Super Duty test group FFMXD06.761B late on Friday, 1/24. Please recall this is the one I mentioned that had tripped manufacturer's confirmatory due to >90% for NO_x.

This new one is in addition to the waiver already out for 10-14K F-350 Super Duty test group FFMXD06.771D.

Please consider and let me know which, if either, test group EPA may want to confirm. I am making plans for retests here to measure N₂O dependent on what we may run at EPA.

Thanks

Best Regards,

Travis Henney (THENNEY)
